(57) Abstract :

The present voting system made by Election Commission is that voter can only give their vote from allotted voting area. Vote is Democracy Rights of the entire Citizen & be a responsible Citizen it is the basic duty for the Country. No one can give their vote if they are not present in the same allotted booth listed by Election Commission. So in that scenario they are not able to give their vote. The impact of current voting system makes average 60% to 70% polling. As per study & examination we can increase the polling percentage by changing Voting system in online mode. The maximum citizen has their Aadhar Card with Unique Identification Number. On time of registration for Aadhar Card candidate have to register their eye retina & finger print. In the online voting system voters can give their votes anywhere by allotted online voting booth define by Election Commission. The voters have to match their retina & figure print register in Aadhar Card then after they have to give their vote. The voters can give their vote from anywhere in the world. In that process the percentage can be increase by 90 % to 100 %.
